Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asahi et al. in view of Smartt, U.S. Patent No. 5,963,956.
- 3.
4. As per claims 1 and 7, Asahi et al discloses representing the database of objects with a hierarchical tree (pg 405, column 1) derived from object metadata (NBA player info); pre-assigning a predetermined parent (root) node to an area corresponding to the undivided graphical environment (pg 405, 2nd column); starting with the predetermined node, for each area corresponding to each parent (root) node in the tree having at least two associated child nodes: recursively partitioning the area into a plurality of areas corresponding to each associated child node such that the areas are proportional to the weight of each child node (pg 405, 2nd column). However, Asahi et al does not disclose a method for partitioning a three-dimensional graphical environment for displaying representative images of objects in a database. This is disclosed in Smartt in column 1 lines 5-25. It would have been obvious to one of ordinary skill in the art at the time the invention was made to partition a 3D graphical environment with a hierarchical tree because this would have increased processor speed because the hierarchical tree made handling large volumes of information much easier.
5. As per claim 9, Asahi et al discloses wherein the area partitioner further comprising a vertical partitioner for vertically partitioning and a horizontal partitioner for horizontal partitioning (pg 405, 2nd column).

Allowable Subject Matter

6. Claims 2-6, 8,10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
